

# BASEBALL

Baseball wagering is based on a money line, which means laying or taking money odds. Unlike point spread bets, the payoff on a winning selection varies, according to the odds. Baseball odds are expressed as a 3-digit money line. All money lines are based on \$100.

The minus (-) indicates the favorite. The plus (+) indicates the underdog.

## EXAMPLE:

TIME	BET#	TEAM	Money Line	Run Line	TOTAL
1:05 PM	903	CHICAGO	- 115	- 1½ + 140	9½ - 110
	904	PHILADELPHIA	+ 105	+ 1½ - 160	- 110

In this example, Philadelphia is the home team. Chicago is a -115 favorite, which means for every \$100 the player wants to win on Chicago, the player must lay \$115. To win \$10, the player would bet \$11.50 and collect \$21.50 if Chicago wins. A wager on Philadelphia would win \$105 for every \$100 wagered or \$10.50 for every \$10. A \$10 wager would return \$20.50.

The number to the right of the money line is the run line. The run line in baseball is similar to the point spread in other sports, except the payouts vary according to the money line odds and are not most often set at -110 on each side. The player making this wager is getting 1½ runs with Philadelphia by laying \$160 for every \$100 the player wants to win. Philadelphia could lose the game by one run and the player would still win. The player may wish to give 1½ runs with Chicago and win \$14 for every \$10 wagered. Chicago would have to win by two runs.

The number at the far right (9½) is the total (over/under) on the game. This is the combined number of runs scored by both teams. The player may wager on the game to go over or under this number. This price is -110 on each side in this example. If final score falls exactly on the number, the wager is "No Action" and will be refunded.

(continued)

**FIRST FIVE INNING WAGERING** – There is the ability to wager on a money line, run line, or total for only the first five innings of a game. The first five inning wager is determined by the score once five full innings of a game are completed.

**BASEBALL PARLAYS** – In baseball, up to twelve teams may be used in a parlay. Totals may also be included in parlays. In a parlay, all teams chosen must win, or the bet is a loser.

Baseball parlays are calculated at true odds by taking the player's original wager plus winnings and applying it to each successive game, using the money lines at the time of the wager. Calculating baseball parlay payoffs can be tricky, but the wagering terminal will quickly calculate and display the payoffs for a player when the bet is entered.

**SPECIAL NOTE:** Please reference our **"House Rules"** for specific rules governing the manner in which the outcome of each sport, event or contest (player or otherwise) is determined. These rules cover cancellations, overtime, conditions to win, conditions to tie, conditions to lose, refunds, parlay payment reductions and all other actions that affect the outcome of your wager.
